

CROPCARE

PA 1400 Motorized Picking Assistant

The **CropCare Picking Assistant** is designed for all your small to large scale crop harvesting, weeding, planting, and bed maintenance needs. The deceptively simple design increases the efficiency of your field workers and maximizes your profits. Durable and easy to clean foam pads adjust to any size operator, and a vinyl canopy protects from weather. The lightweight cart can easily be pulled into position by hand.

Standard Features

- Deep Cycle 12 volt battery and charger keep your picker moving for up to 2 days of normal use.
- Durable all weather vinyl canopy and roll-up curtains protect operator.
- Easy to clean vinyl pads allow for hours of comfortable picking.
- Picking height adjusted through quick-release pins from 20" to 30"
- Width adjustment 36" to 66"
- Ground speed (approx) 18 ft per minute or .21 miles per hour
- Comfort pads are adjustable to any operator size; durable and easy to clean
- High capacity tray holds five flats to minimize trips to and from the field
- Two high torque planetary gear motors provide forward & reverse motion in all types of terrain.

CropCare® High Pressure Single-Sided Boom Sprayers are uniquely engineered with a 25' single-sided boom that is fully hydraulic, featuring hydraulic fold, leveling and height adjustment from 24" to 84". This allows these sprayers to be used on crops ranging from pumpkins to mature sweet corn. A coil spring suspension system helps keep the boom stable in uneven field conditions, providing accurate & thorough coverage. Tank sizes come in 110, 150, 300, and 500 gallons.

Standard Features

- Heavy-duty powder coated steel frame & components
- Easy to operate manual or electric control
- Boom break-away protection
- Quick attach non-drip nozzle bodies
- Dual jet agitation
- In-line filter system
- Wet-tested and ready to spray
- 2 year Limited Warranty

The **CropCare® Plastic Mulch Lifter Wrapper** combines the lifting and wrapping of mulch plastic into ONE EASY PASS. As it splits and lifts the plastic, it rolls the dirt, vines, and trash covering the plastic to the side and wraps the plastic neatly into clean rolls that are easily disposed of. Whether you are removing early sweet corn plastic in the spring or plastic mulch in the fall, the PR2500 will save you valuable time and greatly increase your efficiency in plastic mulch removal.

Standard Features

- Heavy-duty powder coated steel frame & components
- Easy to operate thumb controls
- Category I and II lift pins
- Continuing parts & service
- 2 year Limited Warranty

The collapsible reels can hold up to 2000' of plastic
